Editor's Foreword vii

Foundations of surface science

Historical introduction

Semiconductor electronics and the birth of the modern science of surfaces
H.C. Gatos 1

Interaction of probes with solids at surfaces

Interaction of electrons and positrons with solids: from bulk to surface in thirty years
C.B. Duke 24

Inelastic interactions of electrons with surfaces: application to Auger-electron spectroscopy and X-ray photoelectron spectroscopy
C.J. Powell 34

Interaction of photons with surfaces
A.M. Bradshaw 49

Probing surfaces with ions
E. Taglauer 64

Surface scattering of thermal energy He beams: from the proof of the wave nature of atoms to a versatile and efficient surface probe
G. Comsa 77

Evolution of UHV measurements

Semiconductor surface spectroscopies: the early years
J. Lagowski 92

Surface electron microscopy: the first thirty years
E. Bauer 102

Electron energy loss spectroscopy: the vibration spectroscopy of surfaces
H. Ibach 116

Field emission, field ionization, and field desorption
R. Gomer 129

Atom-probe field ion microscopy and applications to surface science
T.T. Tsong 153

The development of core electron spectroscopies of adsorbates
D. Menzel 170

Photoelectron and Auger electron diffraction
D.P. Woodruff 183

X-ray absorption spectroscopy applied to surface structure: SEXAFS and NEXAFS
P.H. Citrin 199

Low energy ion scattering and recoiling
J.W. Rabalais 219

High energy ion scattering
L.C. Feldman 233

Surface analysis by secondary ion mass spectrometry (SIMS)
A. Benninghoven 246

Adsorption and desorption dynamics as seen through molecular beam techniques
K.D. Rendulic and A. Winkler 261

Molecular beam scattering from solid surfaces: He diffraction, hyperthermal scattering, and surface dynamics
M.J. Cardillo 277

Development of theoretical methods

Density-functional studies of metal surfaces and metal–adsorbate systems
N.D. Lang 284

Tight-binding methods
W.A. Harrison 298

Energy-minimization approach to the atomic geometry of semiconductor surfaces
D.J. Chadi 311

Tight-binding methods as applied to transition metal surfaces
G. Allan 319

Surface Green function matching
F. García-Moliner and V.R. Velasco 332

Quasiparticle theory of surface electronic excitation energies
S.G. Louie 346

Electron-diffraction for surface studies – the first 30 years
S.Y. Tong 358

Multiple scattering theory of electron diffraction
J.B. Pendry 375

Lessons from surface science

Surface thermodynamics

The equilibrium crystal shape and the roughening transition on metal surfaces
E.H. Conrad and T. Engel 391

Phases of helium monolayers: search and discovery
J.G. Dash, M. Schick and O.E. Vilches 405

Stepwise isotherms and phase transitions in physisorbed films
A. Thomy and X. Duval 415

Surface structure and energetics

Making sense of surface structure
P.J. Feibelman 426

Geometrical and chemical restructuring of clean metal surfaces as retrieved by LEED
K. Heinz 433

LEED and clean metal surfaces: personal reminiscences and opinions
P.M. Marcus 447

Strain effects on Si(001)
M.B. Webb 454

Thirty years of atomic and electronic structure determination of surfaces of tetrahedrally coordinated compound semiconductors
A. Kahn 469

Adsorption and adsorbate-induced restructuring: a LEED perspective
M.A. Van Hove and G.A. Somorjai 487

Surface steps and surface morphology: understanding macroscopic phenomena from atomic observations
E.D. Williams 502

Surface electronic and optical properties

Electronic structure of semiconductor surfaces and interfaces
F.J. Himpsel 525

Electronic surface states investigated by optical spectroscopy
G. Chiarotti 541

Surfaces probed by nonlinear optics
Y.R. Shen 551

Quantum transport in semiconductor surface and interface channels
S. Kawaji 563

Surface dynamics

Helium atom scattering spectroscopy of surface phonons: genesis and achievements
G. Benedek and J.P. Toennies 587

Surface phonons: theoretical developments
R.F. Wallis 612

Diffusion of individual adatoms
G. Ehrlich 628

Time-resolved measurements of energy transfer at surfaces
R.R. Cavanagh, E.J. Heilweil and J.C. Stephenson 643

Dynamics of gas–surface reactions
S. Holloway 656

The dynamics of adsorption and desorption
J.C. Tully 667

Chemisorption

Chemisorption on metals: a personal review
D.A. King 678

Theory of adsorption and adsorbate-induced reconstruction
J.K. Nørskov 690

Adsorption on metals: a look from the not-too-far East
A.G. Naumovets 706

Surface phases of reconstructed tungsten (100) and molybdenum (100)
P.J. Estrup 722

Chemisorption on surfaces – an historical look at a representative adsorbate: carbon monoxide
J.T. Yates, Jr. 731

Surface reactions

Reactions at well-defined surfaces
G. Ertl 742

Kinetic modeling of surface rate processes
H. C. Kang and W.H. Weinberg 755

Chemisorption and reactions at metal surfaces
M.W. Roberts 769

Through the labyrinth of surface reaction mechanism: a personal account, 1964–1992
R.J. Madix 785

Atomic processes in crystal growth
J.A. Venables 798

Molecular beam epitaxy of compound semiconductors
J.R. Arthur 818

History of desorption induced by electronic transitions
T.E. Madey 824

Applications of surface science

Catalysis: from single crystals to the "real world"
D.W. Goodman 837

The surface science of heterogeneous catalysis
G.A. Somorjai 849

Chemical beam epitaxy – a child of surface science
H. Lüth 867

Bandgap engineering of semiconductor heterostructures by molecular beam epitaxy: physics and applications
F. Capasso and A.Y. Cho 878

Mechanisms of GaAs atomic layer epitaxy: a review of progress
J.M. Heitzinger, J.M. White and J.G. Ekerdt 892

Metal–semiconductor interfaces
L.J. Brillson 909

Metal–semiconductor contacts: electronic properties
W. Mönch 928

Electrochemical surface science
T.E. Furtak 945

Frontiers of surface science

Scanning tunneling microscopy: a surface science tool and beyond
H. Rohrer 956

Scanning tunneling spectroscopy
R.M. Feenstra 965

The AFM as a tool for surface imaging
C.F. Quate 980

Surface photochemistry
W. Ho 996

Response theory of interfaces, superlattices and composite materials
L. Dobrzynski 1008

On low temperature studies of semiconductor surfaces
V.A. Grazhulis 1022

The development of surface science in China: retrospect and prospects
Xie Xide 1031

Author index 1040

Subject index 1043
